

Aravind Kumar Nalukurthi

Tempe, Arizona, 85281 — Ph: +480-931(1899)— Email: analukur@asu.edu — LinkedIn — GitHub

OBJECTIVE

Data scientist with 3+ years of experience transforming complex user behaviors into million dollar strategies, seeking to join **innovative teams** where deep analytical insights drive transformative product experiences.

EDUCATION

Arizona State University, Tempe, AZ

[08, 2024] – [05, 2026]

Master's in data science, Analytics and Engineering (Computing & Decision Analytics)

Data Mining, Artificial Intelligence, Statistical Machine learning

National Institute of Technology, Calicut

[07, 2018] – [06, 2022]

Bachelor of Technology in Electronics and Communication Engineering

PROFESSIONAL EXPERIENCE

Nineleaps Technologies, Pvt LTD, Software Development Engineer.

[07/04/2022] – [07/15/2024]

Independently contributed as part of the **Global Ads Operations** team for **UBER New York**, serving as a **Data Scientist**. Partnered directly with Uber's product and engineering teams to deliver end-to-end data science solutions for monetization growth initiatives across multiple global markets.

Data Scientist, Uber Technologies Inc

- Designed and executed **35+ A/B experiments** across subscription tiers analyzing **\$25M+ revenue streams**, implementing **statistical power calculations** and **bias detection** that delivered **23% increase in monthly recurring revenue**. Applied hypothesis-driven monetization strategies resulting in **31% improvement in premium subscription conversion rates** across multiple transportation markets.
- Built comprehensive user attribution system **stitching together rider app, driver app, and Eats platform data** across **12 global markets** using **probabilistic matching algorithms**. Enabled unified **customer lifetime value analysis** that increased cross-platform engagement by **28%** and reduced customer acquisition cost by **\$18M annually**.
- Developed **ensemble ML models (XGBoost + Random Forest)** predicting rider churn with **89% accuracy** across **50M+ active users**, implementing **SHAP-based interpretability**. Created automated early-warning triggers that prevented **\$42M in revenue loss** and improved customer success.
- Engineered dynamic surge pricing algorithms processing **200M+ daily ride requests** using **time-series forecasting** and demand elasticity modeling. Achieved **22% improvement in driver utilization rates** and **16% increase in gross booking value** while maintaining **94% rider satisfaction scores**.

PROJECTS

Dynamic Pricing Optimization for Uber Ads (Python, Spark, XGBoost, A/B Testing Framework)

Built real-time ad auction pricing model processing 50M+ daily bid requests, implementing multi-armed bandit algorithms and A/B testing across 15 markets that increased advertiser ROI by 28% and boosted platform ad revenue by \$45M annually through dynamic bid optimization and demand forecasting.

Cross-Platform Ad Attribution & Journey Analytics (Hive, Airflow, Tableau, Statistical Modeling)

Developed multi-touch attribution system linking rider app interactions, driver promotions, and restaurant partnerships across 8 data sources using probabilistic matching and time-decay models, enabling unified campaign measurement that improved marketing spend efficiency by 35%.

Fraudulent Ad Traffic Detection Engine (Python, TensorFlow, Spark Streaming, Elasticsearch)

Engineered real-time fraud detection pipeline analyzing 200M+ daily ad events using ensemble models and anomaly detection, achieving 94% precision in identifying click farms and bot traffic while reducing false positives by 60%, saving \$12M annually in wasted ad spend and improving advertiser trust scores by 40%.

TECHNICAL SKILLS

- **Programming Languages:** Python, R, SQL, Shell Scripting
- **Statistical/ML Techniques:** Hypothesis Testing, Time Series Forecasting, Linear Regression.
- **Data Processing:** ETL Processes, Data Pipelines, Real-time Reporting, Data Visualization
- **Big Data Technologies:** Spark, MapReduce, Hadoop, Databricks
- **Databases:** SQL, PostgreSQL, MySQL, Snowflake **Cloud Platforms:** AWS (S3, EMR, Redshift), GCP
- **Frameworks:** Scikit-learn, PySpark, TensorFlow, PyTorch
- **Visualization:** Tableau, Power BI, Storytelling Techniques

CERTIFICATIONS

- **AWS Certified Machine Learning Engineer - Associate**
- **AWS Certified Machine Learning – Specialty**
- **Microsoft Certified:** Azure Data Scientist Associate
